ROACH GEL
FIPRONIL

AVAILABLE PACKAGING SIZES:

35g

350g

PROLONGED FRESHNESS AFTER PLACEMENT

ULTIMATUM® PEST ROACH GEL stays fresh for a long time because it absorbs moisture from the air. This makes it stay soft, appealing, and easy for pests to consume long after it's applied.

EXCEPTIONAL PALATABILITY

ULTIMATUM® PEST ROACH GEL uses unique bait matrix, free from peanut butter. Thanks to its palatability cockroaches prefer it over other food sources making it effective against all life stages whilst eliminates bait-aversion issues.

Proven efficacy against: *Periplaneta americana* (American cockroach), *Blattella germanica* (German cockroach), *Blatta orientalis* (Oriental cockroach), *Periplaneta fuliginosa* (Smockybrown cockroach), *Sherfordella lateralis* (Turkestan cockroach).

EASE OF APPLICATION

ULTIMATUM® PEST ROACH GEL'S consistency ensures easy, efficient and targeted application. This makes it simple to apply in hard-to-reach areas, enhancing its overall performance in efficient and effective pest management.

KEY BENEFITS

Fast and Effective Results: Quickly eliminates cockroaches through both, ingestion and contact, reducing infestation time.

Enhanced Control Strategy: A valuable addition to any insecticide rotation plan, helping to prevent resistance build-up.

Satisfaction Guarantee: Reliable performance ensures customer satisfaction, building trust with clients.

No Mess or Odor: Leaves no stains or odors, maintaining cleanliness and discretion in treated areas.

Increased Customer Retention: Quick and trace-free results enhance client loyalty and reputation for effective pest control.

Utilizes the power of non-repellent fipronil.

COMPOSITION

- Fipronil (CAS NO. 120068-37-3) 0.05%
- Inerts: 99.95%

ROACH BAIT STATION
FIPRONIL

SNAP-SQUEEZE AND USE

KEY BENEFITS

Time Efficiency: The easy-to-activate design (snap, squeeze, and use) allows for quick application, enabling PMP's to cover more areas in less time and increasing service efficiency.

Enhanced Safety and Cost Reduction: With no need for direct contact with the gel, PMP's experience safer application and handling, reducing the risk of accidental exposure to insecticide. No PPE required.

Improved Customer Satisfaction: The fresh gel formulation remains attractive to roaches for longer time, leading to faster results and higher client satisfaction with reduced callbacks.

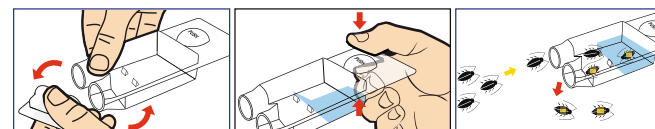

Versatility and Convenience: The bait station's compact design and flow pack protection make it suitable for various environments, both residential and commercial, without contamination concerns.

Professional Presentation: The bait station provides a clean and professional solution, leaving no mess and ensuring discreet placement in sensitive areas, which can enhance the PMP's reputation.

Cost Efficiency: By using long-lasting fresh gel and minimizing the need for frequent replacement, PMP's can reduce material costs and maximize their business profitability.

COMPOSITION

- Fipronil (CAS NO. 120068-37-3) 0.05%
- Inerts: 99.95%

SNAP OFF the edge of the trap.
SQUEEZE the bait chamber.
POSITION the trap.
